

HOW THE SYSTEM WORKS IN SIMPLE WORDS

1. Cloud Database (Supabase): Keeps all production shift reports securely stored on the internet.
2. Online App (Vercel): Provides a website link (e.g. radiance.vercel.app) for mobile phones on the factory floor.
3. Laptop Master Sheet: When an operator taps "Submit", it instantly reflects on your laptop screen live!

STEP 1: Set Up Free Cloud Database (Takes 3 Minutes)

1. Open your browser and visit: <https://supabase.com>
2. Click "Start your project" and sign in with your Google account or work email.
3. Click the green "New Project" button:
 - Name: Type "radiance-production"
 - Database Password: Choose any secure password and save it.
 - Region: Select "South Asia (Mumbai)" for fastest India speed, then click Create.
4. In the left sidebar, click the SQL Editor icon (looks like >_):
 - Click "New query".
 - Open file: `supabase/migrations/20260922_cloud_sync_master_schema.sql` from project folder.
 - Copy all contents, paste into the box, and click the green "Run" button.
 - You will see "Success. No rows returned". Your cloud table is now live!
5. In the left sidebar, click the Settings Gear icon (&™p) "" API (or Data API):
 - Copy your Project URL (e.g. <https://xyzabcdef.supabase.co>)
 - Copy your anon public key (long text starting with eyJ...)

STEP 2: Enter Supabase Keys in App Settings (Takes 1 Minute)

1. Open the Production Report App on your laptop.
2. Click the "Settings" tab in the navigation bar.
3. Scroll down to the "System Health & Supabase Cloud" section.
4. Paste your Project URL and Anon Public Key from Step 1 into the fields.
5. Click "Test Live Connection" "" App displays: "Ø=ßâ Supabase Ping Succeeded!"
6. Click "Save Configuration". The app is now connected to the cloud!

RADIANCE POLYMERS PVT. LTD.

EASY STEP-BY-STEP GUIDE: GOING ONLINE & LAPTOP MASTER SHEET

Hosting, Live Reflection & Spreadsheet Integration

STEP 3: Host the App Online with Vercel (Takes 2 Minutes)

1. Go to <https://vercel.com> and sign up/log in with your Google account.
2. Click "Add New..." "Project" and import your project directory/repository.
3. Under "Environment Variables", add the two keys from Step 1:
 - Name: VITE_SUPABASE_URL | Value: (Your Supabase Project URL)
 - Name: VITE_SUPABASE_ANON_KEY | Value: (Your Supabase Anon Key)
4. Click the "Deploy" button.
5. Within 60 seconds, Vercel gives you a secure live URL (e.g. <https://radiance.vercel.app>).
6. Share this link with your machine operators via WhatsApp. No installation required!

STEP 4: How It Appears on Your Laptop Master Sheet

- Open the app on your laptop and click the "Master Sheet" tab in the top navigation.
- You will see a green badge: "Ø=ßâ Supabase Cloud Live".
- Whenever any operator submits a shift on the shop floor from their phone, it reflects INSTANTLY at the top of your Laptop Master Sheet without needing to reload or refresh!
- Click "Download Master Excel (.xlsx)" anytime to download a formatted cumulative workbook.

OPTIONAL: Link Directly to Personal Google Sheet on Your Laptop

1. Open a Google Sheet on your laptop: "Radiance Production Master Sheet".
2. Click Extensions " Apps Script, paste the 15-line script provided in the app, and click Save.
3. Click Deploy " New Deployment " Web App (Who has access: Anyone) " Copy Web App URL.
4. In the app's Master Sheet, click "Link Google Sheet", paste the URL, and click Save.
5. Every submitted shift report will now also append a brand-new row into your Google Sheet!

' 100% Offline Resilience Guarantee

If shop-floor Wi-Fi drops, operators can continue entering hourly data and submit reports normally.
The app stores data locally and automatically syncs to the cloud and your laptop as soon as connection returns.
